# ESL 1 Electronic Signal Lamp

## with three independently controllable colours

### Description

KROMA ESL 1 signal lamps are designed for visual indication of electric signals. The ESL 1 is suited for use as a one-, two- or three-colour warning lamp and as a one-colour emergency lamp. The housing of the lamp is made of stainless steel, completely watertight, welded and vandal-safe. The lamp is installed in the vehicle's side from outside. It can be fastened with screws from outside or inside. Long-life LED's eliminate the need for replacement of illuminants. Extra bright LED's are arranged behind a Fresnel lens. Their bright and good visible signal light permits a wide viewing angle. The electronics are encapsulated and guarantee constant luminosity over the whole operating voltage range ( $0.7 < U_N < 1.3$ ). Three signals with different colours can be driven from outside (e.g. directly by a computer) without electric power. They can be programmed by the manufacturer for different flashing frequencies. Available signal colors are white, red, yellow, green and blue.

### Special features

- Flat design - to be fastened with screws from inside or outside -, vandal-safe, watertight (IP 67)
- Three separate signals, different colours
- Each signal colour is available as a steady burning light or flashing light (0.5 Hz) (programmable flashing frequency)
- Drive without electric power possible
- No replacement of illuminants - extra bright LED's - long life
- High light efficiency at low electric power
- Controlled constant luminosity over the whole operating voltage range
- Tested according to German railways' standard BN 411002/EN 50155 (approved for use on rail vehicles)

### Technical data

Optical signals:	Two-signal lamp
Operating voltage:	24 V DC (16 to 32 V), as special version 36 V DC (16 to 48 V)
Operating current (full load):	100 mA
Illuminants:	extra bright light-emitting diodes, 16 LED (1 <sup>st</sup> colour) + 8 LED (2 <sup>nd</sup> colour) + 4 LED (3 <sup>rd</sup> colour)
Signal colours (colour code):	white, red, yellow, green, blue (customized)
Flashing frequency:	0.5 Hz (other frequencies programmable by the manufacturer)
Control inputs:	2 mA
Degree of protection:	IP 67 as per EN 60529
Humidity class:	F as per BN 411002
Connecting elements:	Cord set with four-pole plug or integral cable
Installation:	From outside (75 mm $\leq$ $\varnothing$ hole $\leq$ 80 mm)
Mounting:	2 M5 screws, accessible from inside or outside (depending on connecting elements)
Operating temperature range:	-40°C to +70°C
Storage temperature range:	-55°C to +70°C
Vibratory strength:	20 m/s <sup>2</sup> (5 to 150Hz)
Shock resistance:	50 m/s <sup>2</sup>
Weight:	0.270 kg

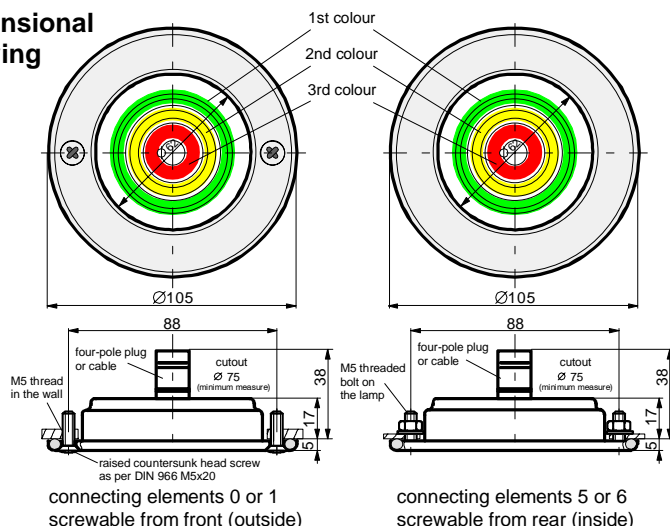

### Information required with order

Type :	KROMA ESL 1 Electronic Signal Lamp	<b>ESL 1 . 1 3 2 1 0 - 5</b>
Connecting elements:	"0" = screwable from front, with four-pole plug "1" = screwable from front, with integral cable "5" = screwable from rear, with four-pole plug "6" = screwable from rear, with integral cable	
1 <sup>st</sup> colour:	"3" = green, steady burning light (see colour code)	
2 <sup>nd</sup> colour :	"2" = yellow, steady burning light (see colour code)	
3 <sup>rd</sup> colour:	"1" = red, steady burning light (see colour code)	
Drive:	"0" = none (switching on by operating voltage) "1" = switching on with separate control signal (active low) "2" = switching on with separate control signal (active high)	
Cable length	"5" = e.g. 5 m	

### Colour code:

"0" = white steady	"1" = red steady	"2" = yellow steady	"3" = green steady	"4" = blue steady burning light
"5" = white flashing	"6" = red flashing	"7" = yellow flashing	"8" = green flashing	"9" = blue flashing
